

We are Air Products

Understanding . . . Integrity . . . Passion . . .

Operating with safety, speed, simplicity and self-confidence, our goal at Air Products is to be the world's safest and best performing industrial gases company, providing excellent service to all of our customers. For over 75 years, we have been building lasting relationships with our customers and other stakeholders by understanding their needs, doing business with integrity, and demonstrating a passion for exceeding their expectations.

Air Products is a world-leading industrial gases company that touches the lives of consumers in a positive way everyday with the products we help our customers produce. Our core industrial gases business provides atmospheric and process gases and related equipment to manufacturing markets, including refining and petrochemical, metals, electronics, and food and beverage. Air Products is also the world's leading supplier of liquefied natural gas process technology and equipment.

Industrial Gases Applications with Sustainability Benefits

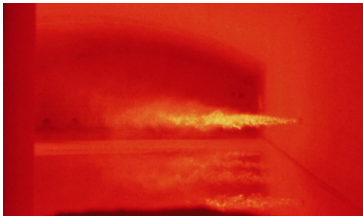

Applying our gases and applications know-how, our customers can cost-effectively reduce energy use and improve environmental performance, which benefits consumers every day.

Nitrogen for cooling, chilling and freezing food, improving quality, yield, and shelf-life

Gases for Modified Air Packaging (MAP) to preserve and improve the taste of food and reduce waste

Oxygen for energy-intensive industries, such as steel, coal gasification, chemicals, energy, and glass

Hydrogen for refining heavier, sour crudes into cleaner transportation fuels, increasing yields

Oxygen to improve fish health in aquaculture and for water treatment

Helium for magnetic resonance imaging and medical gases for sustaining life

LNG technology and equipment to economically transport stranded energy resources

Hydrogen for fuel cells from which water is the only emission
